Wedge Wire Screen Tube for Saveall/Thickening

Objective

Pulp is commonly made from wood or recycled fibre, there are many stickies, plastic, specks shives, bark fragments and debris in pulp fibre. In order to enhance the quality of pulp destined for a wide range of pulp and paper products, washing and thickening pulp fibre is an essential process in pulp and paper production.

Solution

Wedge wire screen tube is a kind of pressure screen basket, it is one part of the paper pulp pressure screen. The pressure screen baskets are mainly used for pulp thickening in the pulp and paper making process. The screen made of v shape wire, the slot is narrow in the above and wide in the below, thus enables the water for easy through the slit, and can be separated qualified fiber from the impurities and fiber bundles effectively, thus improves the screening efficiency and quality of the pulp.

Idea for	Screen Size	Features & Benefits
<ul style="list-style-type: none">Fiber recovery: rich white waterPulp thickening: cleaner rejectsFiber fractionation	<ul style="list-style-type: none">DN 24"DN 27 1/2"	<ul style="list-style-type: none">High fiber recovery efficiencyPromotes good fiber and rejects separationLow maintenance requirements and costsLong service lifeLess loss of fiber

Technical Parameters

When ordering, please specify:

1. Wedge Wire Screen Type

Wedge wire cylindrical screen

2. Slot Hole

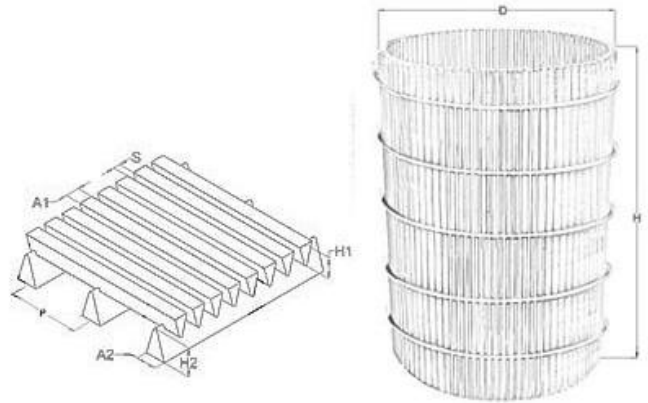

3. Profile Wire

Triangle wire

4. Support Rod

Triangle wire, round rod, flat bar, wedge wire

5. Support Rod Pitch

Wedge Wire Cylindrical Screen
